

The background of the header is a dark teal color. It features several stylized illustrations: a glowing yellow lightbulb with rays in the top left; several orange books floating in the air; a blue laptop in the bottom left; and a white wireframe of a website layout in the bottom right. The title 'Widespread Blogs' is written in a large, white, cursive script font, slanted upwards from left to right.

# Best Blogs From The Entire Community!

The Blogs Are Rich In Content And Are Verified By Writers And Developers,  
After Being Posted.

Our Skilled Employee Ensure That, Plagiarism Free Content Is Being Uploaded And  
That, Further Professional Issues Will Not Appear.

# Willing To Stay Updated? You're At The Right Place.

As We Have A Variety Of Topics, The Numerous Ideas Keep Emerging, Thus Helping To Stay With Surrounding. They Include General And Imagery Aspects Which Help The Reader Get Submerged Into Reading, Allowing To Increase Vocabulary And Spend Time Wisely.

# Who We Are

## ATTRIBUTES

---

### Responsive Design

You do not need to worry about reading it on a MAC, Windows or your phone. It's all set.

### Exclusive Content

The Blogs we write are plagiarism free. We are sure you'll love their creative nature, too.

### Bug Free Website

Once you open something up to read, it stays there even if you lose internet. So you can read the entire blog without a worry.

### Permanent Storage

The blogs posted stay there forever. So if you feel like sharing it someone... You can go ahead anytime in present or future.

### Graphically inclined

We believe that readers are interested to see the images or graphics alongwith the content, and so we have integrated the same.

### 24/7 Support

We value our readers. And so if you ever feel incur some problems, contact us and we will look into it.

## About Us

---

We are the duo that aspire and work tirelessly to come up with some awesome, fun and exciting content for the users. We believe that "An engaged reading, 'online' is much more potent than the other sources", but with due respect about written sources too.

With every single aspect in mind, we try and follow the simplified yet appropriately coded skills. These are not only with us, but also followed by the IT industries as a whole. Thus staying up-to-date, is a point that comes in one of the proficiencies we always look upon as a priority.

## Space Infinity!

- Sankalp Indish

Space is truly something that is beyond ones imagination. When one looks at it the awe is unnatural. But its not just limited to that. When other cases are considered space becomes an infinite band of darkness lit only by stars. Galilean and Cartesian theories about space matter and motion are at the foundation of the Scientific Revolution which is understood to have culminated with the publication of Newtons Principia in 1687. Descartes set out to replace the Aristotelian worldview with a theor

# Space Infinity!

by Sankalp Indish

Space is truly something that is beyond one's imagination. When one looks at it the awe is unnatural. But it's not just limited to that. When other cases are considered space becomes an infinite band of darkness lit only by stars. Galilean and Cartesian theories about space, matter, and motion are at the foundation of the Scientific Revolution which is understood to have culminated with the publication of Newton's *Principia* in 1687. Descartes set out to replace the Aristotelian worldview with a theory about space and motion as determined by natural laws. Many ideas still progress not even close to 10%.

Space is an almost perfect vacuum nearly void of matter and with extremely low pressure. In space sound doesn't carry because there are not molecules close enough to transmit sound between them. Not quite empty bits of gas, dust, and other matter float around emptier areas of the universe while more crowded regions can host planets, stars, and galaxies. From our Earth-bound perspective outer space is most often thought to begin about 62 miles meaning 100 kilometers above sea level at what is known as the Kármán line. This is an imaginary boundary at an altitude where there is no appreciable air to breathe or scatter light. Passing this altitude blue starts to give way to black because oxygen molecules are not abundant enough to make the sky blue. No one knows exactly how ample space is. It's difficult to determine because of what we can see in our detectors. We measure long distances in space in light-years representing the distance it takes to travel in a year roughly 5.8 trillion miles that is 9.3 trillion kilometers.

# Write your ideas :)

## Astronomy

We hope you'll bring out your creative thoughts in a professional, readable and appreciable way.  
Wish you all the best!
